ABOUT ME

I enjoy working on challenging projects with creative people, pursuing clean code and mature software architecture. In the last years I am focusing mainly on the backend, designing and building distributed, microservices oriented systems.

SKILLS

Programming

- | | |
|----------------|------------|
| ✓ .NET Core | ✓ Web API |
| ✓ C# | ✓ RabbitMQ |
| ✓ Git | ✓ CI/CD |
| ✓ SQL Server | ✓ MongoDB |
| ✓ TimescaleDB | ✓ K8S |
| ✓ Microservice | ✓ BPMN |
| ✓ Typescript | ✓ React |

Viktor Borza

.Net Developer / Software architect

EXPERIENCE

Chief Software Engineer

[Signals Network](#)

📍 Prague | Remote

Jun 2018 - Now

📁 Contract

Designing and building an automated trading platform for crypto exchanges, working closely with developers and executives to align technology with product vision and meet requirements for performance, security, code quality, and scalability of the product.

Senior .Net Developer

[RWS Moravia](#)

📍 Brno | Remote

April 2016 - Now

📁 Contract

Building core business products, as well as services responsible for real-time data exchange and transformations between third-party systems and internal applications. Participation in an internal project focused on providing a set of best practices, systems, and internal libraries for the in-house developers, who needed to support workflows, BPMN processes, asynchronous communication, etc.

Lead .Net Developer

[Elekos](#)

📍 Nitra | Remote

Feb 2017 - Oct 2017

📁 Freelance

Development of internal web-based information system supporting business processes in Elekos company, which is helping their clients to fulfill the waste producers' obligations according to the environment law. The system consists of two ASP.NET MVC applications – a client portal, and an administration system for the employees.

.Net Developer

[FNZ](#)

📍 Brno

Feb 2014 - Dec 2015

📁 Full-time

Building complex financial ASP.NET systems supporting real-time investment transactions, used by financial advisers and investors. The job required close collaboration with the business analyst team from the UK and my assistance in the preparation of the software requirements specification documents.
